

MISSION READY

Mission I

Due Date: Mission 1: 24/08/2022 in class

Learning Topics: HTML, CSS

Mission Brief:

In order to successfully hone your HTML and CSS skills, we ask you to **design and create a one-page personal website**.

This mission will demonstrate your comprehension and understanding relating to the various practices and languages shared during the first two weeks of the course.

Content-wise, the personal web page can be whatever you want to it to be. Anything from a professional looking business page to a site about penguins, **just remember the mission is to demonstrate coding abilities/practices so if you are struggling on the design & content of things, KEEP IT SIMPLE**. If you are struggling for a place to start, feel free to create a personal portfolio page or turn your CV into a web page (most likely when you apply for a job they're going to want to see your work, what better way to show them than with a web page).

This mission is for practice purposes. It is NOT part of an assessment for NZQA qualification.

Examples:

<http://findmatthew.com/>

<https://chipd.github.io/>

<http://ejosue.com/>

<https://andrewborstein.com/>

<https://www.sakshamanand.com/>

Mission 1 Details:

Show and demonstrate an understanding of HTML & CSS Coding Languages by including the following elements in your page:

HTML

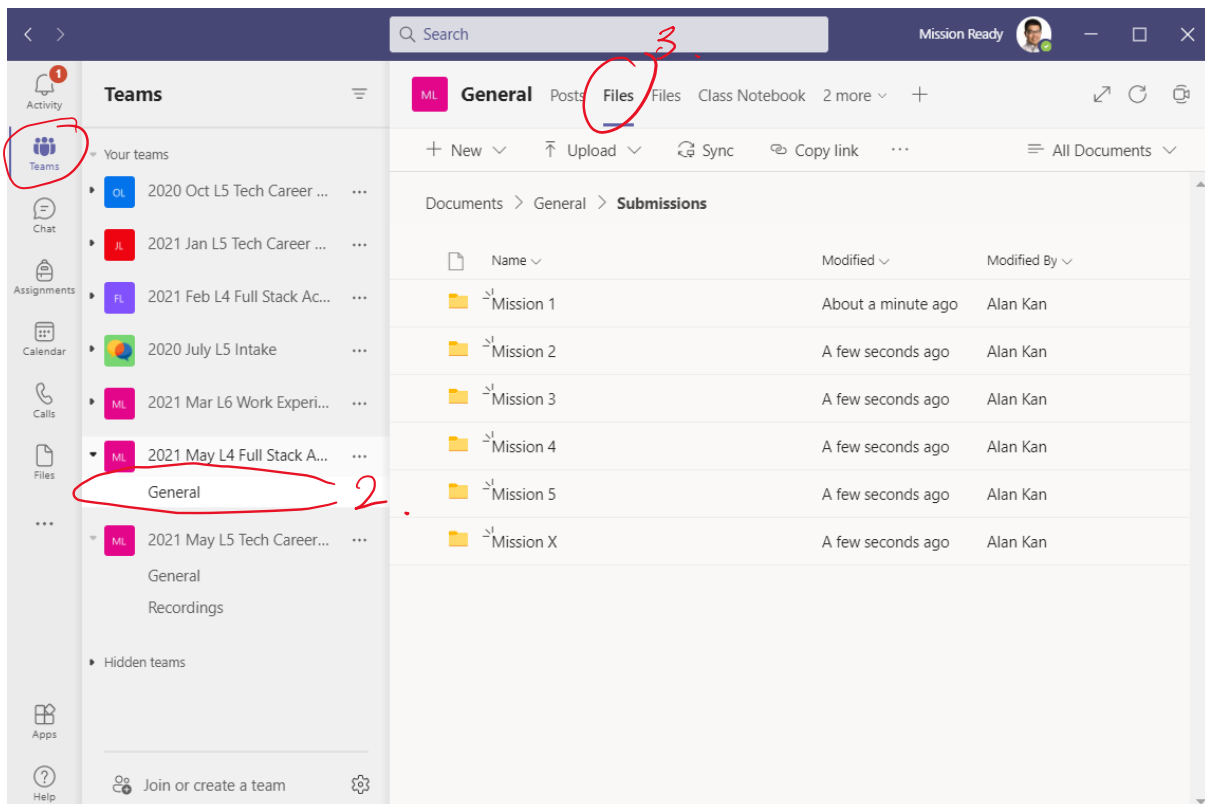

- <head> tag
- <body> tag
- <div> tags
- <h1> tags
- <p> tags
- tags
- <a> tags
- 'Class' or 'ID'
- Email Contact Form

CSS

- Flexbox
- Background Stylation of <Body> or <div>
- Font Stylation
- Margins
- Width & Height
- Animations

Mission Completion Instructions:

1. Go to Microsoft Teams > Teams > 2022 Aug L4 Full Stack Accelerator > Brilliant Stream > Files > Submissions > Mission 1

2. Create a folder, name it with your first and last name

3. Upload your completed code files to the folder you created, or upload a txt file containing the link to GitHub page that hosts your code files.
4. On the due date, be prepared to show everyone what you have done (both a quick demo of the page and showing a bit of code you wrote). You should prepare to talk for no longer than 5 minutes.
